

Furniture

- Easily bring the shine back into your furniture by putting a small amount of **Baby Oil** on a clean dry rag. Wipe down furniture and see it shine!

Ceiling Fans

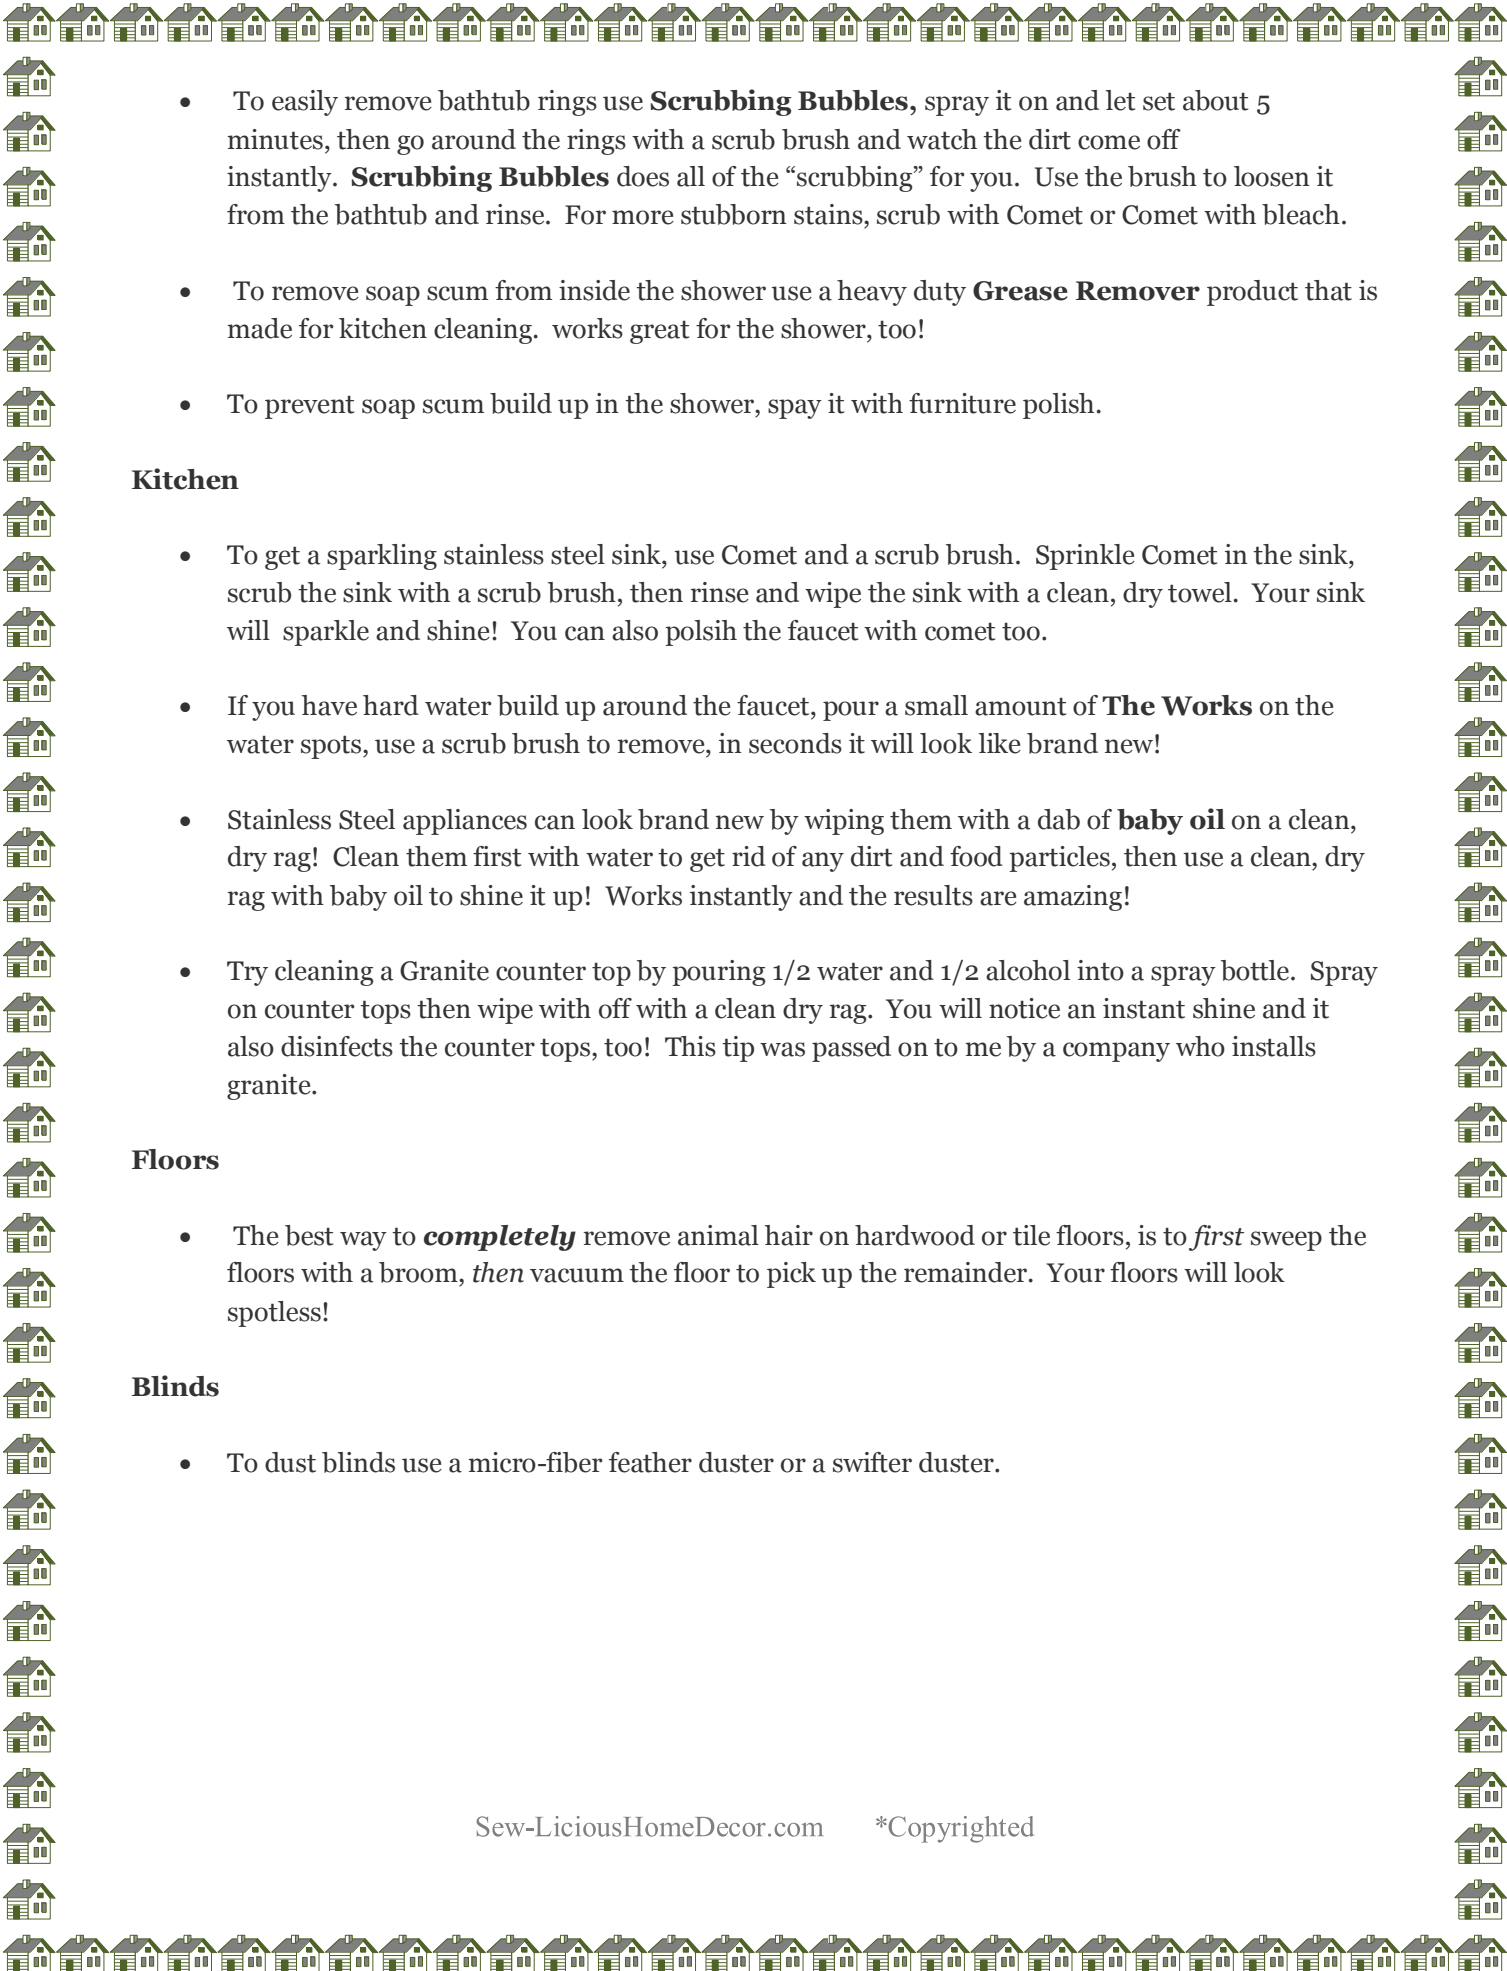

- Dust the ceiling fan blades with a broom. It makes it easy to reach without using a ladder and the sharp blades from the broom easily scrape off the dust from the edges of the blades. The dust will fall to the floor and *after* you have cleaned the entire room just vacuum up the dust!

Bathroom

- To remove water spot rings in your toilet use a product called "[The Works](#)" it works instantly! Just put a small amount into the toilet on the water spots and watch them disappear instantly! You can find it at Wal-Mart, Dollar General, Sams Club and I've even seen it at The Dollar Store.

- To remove water spots from shower glass doors use a product called **Lime Away** or **The Works** (above). Pour some on a clean dry rag and wipe the door and you can also pour some into a water bottle and spray it on, rinse with water afterwards. Be careful, the fumes are strong! Dry glass door with a dry towel or paper towels.
- Make toilets spotless by using a scrub brush. Use a scrub brush on the outside of the toilet, behind the lid where the screws latch, and at the base of the toilet. This way your hands never have to touch a dirty rag or a dirty toilet!

- 
- To easily remove bathtub rings use **Scrubbing Bubbles**, spray it on and let set about 5 minutes, then go around the rings with a scrub brush and watch the dirt come off instantly. **Scrubbing Bubbles** does all of the “scrubbing” for you. Use the brush to loosen it from the bathtub and rinse. For more stubborn stains, scrub with Comet or Comet with bleach.
 - To remove soap scum from inside the shower use a heavy duty **Grease Remover** product that is made for kitchen cleaning. works great for the shower, too!
 - To prevent soap scum build up in the shower, spray it with furniture polish.

Kitchen

- To get a sparkling stainless steel sink, use Comet and a scrub brush. Sprinkle Comet in the sink, scrub the sink with a scrub brush, then rinse and wipe the sink with a clean, dry towel. Your sink will sparkle and shine! You can also polish the faucet with comet too.
- If you have hard water build up around the faucet, pour a small amount of **The Works** on the water spots, use a scrub brush to remove, in seconds it will look like brand new!
- Stainless Steel appliances can look brand new by wiping them with a dab of **baby oil** on a clean, dry rag! Clean them first with water to get rid of any dirt and food particles, then use a clean, dry rag with baby oil to shine it up! Works instantly and the results are amazing!
- Try cleaning a Granite counter top by pouring 1/2 water and 1/2 alcohol into a spray bottle. Spray on counter tops then wipe with off with a clean dry rag. You will notice an instant shine and it also disinfects the counter tops, too! This tip was passed on to me by a company who installs granite.

Floors

- The best way to **completely** remove animal hair on hardwood or tile floors, is to *first* sweep the floors with a broom, *then* vacuum the floor to pick up the remainder. Your floors will look spotless!

Blinds

- To dust blinds use a micro-fiber feather duster or a swifter duster.

Overall Cleaning Tips

- The best way to clean a room is to start at the *top* and work your way *down*. Clean*high* first such as ceiling fans, blinds, and furniture. Always do the floors *last* this way you will be sure to get all the dust that falls from the fans, blinds, and furniture.
- When vacuuming or mopping, work your way so that you *finish* at the door so you don't leave foot tracks.
